TECHNOLOGIES OF CONFIDENCE

Aleksei Lavrik, General Director of the company LAVR, and his father Aleksandr Nikolayevich Lavrik, the founder of the production, a doctor of technical science, professor of the Department of Internal Combustion Engines of South Ural State University.

Dear friends!

We are all united by our care for automobile equipment. The car is a source of inspiration for us and the essence of our work, and for this reason each new step of the LAVR Company is connected with search for the best technologies of creating chemicals and car care products.

The history of LAVR is about how passion became a small family business which has grown into a serious enterprise. It all started with the idea of manufacturing chemical products for engines. That is the very case when scientific potential was applied in actual practice instead of being stuck in the framework of theoretical research of a university laboratory. We know almost everything about the work of the engine and various systems of the car. That is why the efficiency of LAVR products is technologically conditioned, and the result is guaranteed.

Despite the obvious growth for over 20 years of our presence in the market, I am happy about the fact that we have not developed the "diseases of big business" and still continue to closely monitor every step of "newborn" products from the idea to production, from the laboratory test tubes to the shelves of your store and real application.

LAVR has already earned the respect and recognition of millions of ordinary motorists and professionals. The secret is simple: we solve real problems that car owners are facing today. These include inferior fuel quality, severe climatic conditions and unsatisfactory culture of vehicle service. I believe that an important task for us is first of all to convince people that regular and minor costs of preventive measures are always justified by serious economy on repairs.

We prove that our products really work with specific practical examples such as decarbonisation of the engine or washing of injectors. It is important for us that everyone who chooses LAVR products is confident in the result.

Motorists regularly send comments and questions to our website [www.lavr.ru](http://www.lavr.ru). I am very pleased to answer them and often advise them personally to help them choose the right product and use it correctly.

It is mostly personal relationships that allow us to do our job with love and respect our work and people who create LAVR with me.

I am glad that you are holding the catalogue of auto chemicals and car care LAVR products in your hands. Welcome to the ranks of our co-thinkers.

## PROFITABLE BUSINESS WITH THE LAVR COMPANY

LAVR is one of the leading producers of auto chemicals and auto cosmetics in Russia and the CIS. During 20 years of successful work done, the company has gained recognition of millions of car owners and masters of car service stations. Join our team and appreciate the benefits of working with us.

### OUR OWN PRODUCTION

Working directly with the manufacturer allows you to receive high-quality products and establish stable supplies on favourable terms.

### CLEAR POSITIONING

Our products take the price gap between Western and Russian manufacturers. In many cases, the quality of our products is superior in comparison with the well-known world brands.

LAVR products are made from raw materials of European quality, have high concentration of active ingredients and guaranteed efficiency. Each product is based on a combination of knowledge, experience and high qualification of our engine specialists and chemists.

### REGULAR UPDATE OF PRODUCTS

We do not stop at what we have achieved and are constantly improving by developing new technologies, modifying the formulas of the existing products and creating new ones.

### SIMPLE AND UNDERSTANDABLE BUSINESS

We guarantee easy interaction at all stages of cooperation because we always build partnerships aimed at developing and strengthening the position of our partners. We work with all distribution channels: car washes, repair shops, specialist and non-specialist retail.

### STABLE GROWTH

Our modern sales techniques and well-established products guarantee our partners profit growth.

### TRAINING

We constantly conduct educational work among specialists, sellers and consumers. In an easy and accessible way, we will tell your staff about our products and techniques of their promotion.

## INFORMATIONAL AND PROMOTIONAL SUPPORT

We help our partners to build a profitable business and provide comprehensive marketing support:

- provide promotional materials in various formats for arrangement of points of sale - posters, brochures, leaflets, souvenirs, etc.;
- provide training materials for improvement of sales techniques;
- supply branded sales and service station equipment;
- carry out stimulating activities and campaigns;
- promote our brand in the media and online resources.

### COMMUNICATE WITH US IN SOCIAL NETWORKS

Auto chemistry and auto cosmetics LAVR on the social networks VKontakte ([vk.com/lavr\\_ru](https://vk.com/lavr_ru)) and Facebook ([facebook.com/lavravtohimia/](https://facebook.com/lavravtohimia/)) are complete platforms for communication with our partners and customers providing the following:

- announcements, tests and reviews of our new products;
- useful tips on car maintenance by means of our products and chats with the members of our communities;
- relevant and interesting information about the updates in the automotive world.

**Sign up and be the first to find out news!**

### FIND MORE ABOUT LAVR PRODUCTS ON OUR WEBSITE

The website [www.lavr.ru](http://www.lavr.ru) is an indispensable assistant to motorists and a reliable guide to our range of auto chemicals and auto cosmetics. It provides you with:

- tests that demonstrate the benefits and mechanisms of action of LAVR products;
- detailed instructions and descriptions;
- an opportunity to get professional advice from the experts of the company;
- contact information of our wholesale partners and official retail outlets of LAVR in various regions.

# PROFESSIONAL CLEANING OF THE INJECTION SYSTEM

**AUTO CHEMICALS**

## PRODUCTS FOR ENGINE DECARBONISATION

### PROBLEM

One peculiarity of functioning of the engine is that even fuel of the most superior quality does not burn completely inside the combustion chamber. Part of the unburned petrol and diesel fuel inevitably turns into hard sludge deposits and coke. The products of oil combustion also stay in the cylinder forming resin deposits which accumulate in piston grooves and oil drain back holes. With time, these deposits harden and turn into coke limiting the normal mobility of compression and oil control rings. This leads to compression reduction, difficult start of the engine, increase in oil and fuel consumption, deterioration of driving dynamics, initiation of vibration and considerable wearing out of combustion chamber parts.

The engine coking problem is not new. However, for a long time it did not have an optimal solution. Solvents used for this purpose even after long treatment could not cope with contamination and clean affected engine parts.

### SOLUTION

The LAVR Company has developed a new method of influence on resin-coke and carbon deposits in the engine. On the basis of this discovery, products for engine decarbonisation, namely LAVR ML202 and LAVR ML203 NOVATOR, were created. The principle of their work rests on turning resinous and hard deposits into a soft jelly, part of which is subsequently burned and the other part is washed away by fuel and oil during engine operation.

Tests and auto service practice have demonstrated that ML202 and ML203 NOVATOR do not only soften contamination deposits and "exempt" piston rings, but also clean the combustion chamber. Thus, decarbonisation significantly prolongs engine life.

Numerous cases of positive customer feedback and independent experiments have proved the safety and efficiency of our products.

LAVR ML202 is a classic fluid for decarbonisation acting from 1 to 12 hours.

LAVR ML203 NOVATOR is an extra strong fluid for express-decarbonisation during 1 hour.

## THE RANGE OF LAVR ML202/ ML203 IS THE LEADING PRODUCTS OF THE COMPANY

Together with washing/flushing products for injection systems, **anti-coke cleaning products can provide up to 60% of the retailer's revenue** of all LAVR goods.

### ANTI-COKE ENGINE CLEANER ML202

A kit for the standard engine  
Ln2502 | 185 ml

A unique product cleaning the combustion chamber and piston rings from deposit substances. It eliminates the cause of fast wear of the engine. This package is for standard engines up to 2 litres.

### ANTI-COKE ENGINE CLEANER ML202

A kit for the non-standard engine  
Ln2504 | 330 ml

This fluid in a special package of 330 ml is for non-standard engines above 2 litres.

### SET OF ANTI-COKE ENGINE CLEANER ML202 + ENGINE FLUSH

LAVR kit for thorough engine cleaning

Ln2505 | 185 ml + 330 ml

This set provides a complex approach to cleaning the engine. It decarbonises and flushes the engine, and helps to carry out complete maintenance increasing the capacity of the car.

### ANTI-COKE ENGINE CLEANER ML203 NOVATOR

A kit for the standard engine  
Ln2506 | 190 ml

Its active components guarantee complete removal of stubborn resin-coke dirt from the piston, piston rings and combustion chamber elements within 1 hour. The package is intended for standard engines with the volume of less than 2 litres.

### ANTI-COKE ENGINE CLEANER ML203 NOVATOR

A kit for the non-standard engine

Ln2507 | 320 ml

The special 320 ml package is intended for engines with the volume above 2 litres.

## PROFESSIONAL PRODUCTS FOR CLEANING FUEL SYSTEMS

### PROBLEM

Any fuel contains resin and other components which form deposits in the fuel system. Therefore, contamination of the fuel system is one of the top causes of engine malfunctions. Resinous sediments contaminate not only injectors, but also valves, fuel pumps, etc.

### SOLUTION

Ural scientists were the first in Russia to develop products for professional cleaning of the fuel system of the internal combustion engine. The unique properties and effectiveness of these products allowed the LAVR Company to obtain a patent for the invention of a new method of cleaning. It is worth mentioning that we still remain the only Russian enterprise manufacturing products of this class in an industrial way!

### PRODUCTS ML101 AND ML102 HAVE REPEATEDLY WON IN INDEPENDENT COMPARATIVE TESTS

The test group of the magazine **The Consumer. Autobusiness** studied the effectiveness of chemicals for fuel system cleaning using visual and quantitative methods in their research.

The study group used gridded brass elements which were covered with contaminants similar to those in fuel injectors for 3 months. The results are illustrated below.

Thanks to LAVR products it became possible to implement a number of tasks:

- Ultimately effective cleaning of the injection system.
- Completely safe contact with the elements of the fuel system and equipment.
- Fast cleaning without extreme engine rev.
- Pronounced decarbonising effect.

Passing Capacity Improvement	By 50 %	By 70 %
Presence of Contamination Remains	10%	None

### PURGE OF INJECTION SYSTEMS ML101 EURO

Ln2007 | 1000 ml

### PURGE OF INJECTION SYSTEMS ML101 WITH ANTI-COKE EFFECT

Ln2001 | 1000 ml

### PURGE OF DIESEL SYSTEMS ML102 WITH ANTI-COKE EFFECT

Ln2002 | 1000 ml

LAVOR products for cleaning fuel injection systems are the most demanded during the car maintenance season. They bring an outlet up to 36% of the overall revenue of LAVOR goods.

With the updated complex of washing components, the product gentler affects the injectors' contamination, which makes it ideal for preventive maintenance of new generation engines.

Purging fuel injectors at a service station is one of the most popular procedures of car maintenance. Our products are chosen by the best dealer service centres of BMW, CHEVROLET, FORD, KIA, MERCEDES and other leading automakers.

The bright distinctiveness of ML101 and ML102 is an outstanding decarbonisation effect, which other products of this type do not have. The efficiency and safety of our purges are confirmed by a patent for the invention of a new method of injection system cleaning.

## EQUIPMENT FOR PROFESSIONAL CLEANING OF FUEL SYSTEMS

### PNEUMATIC STATION LAVOR FOR PURGING PETROL AND DIESEL INJECTORS

Ln2013

This versatile and cost-effective tool should be in the arsenal of any service center. It is equipped with a basic set of adapters. It is perfect for purging diesel and petrol injection systems using the products ML101, ML101 EURO and ML102.

### FITTING KIT FOR LAVOR PNEUMATIC STATION

Ln2014

An optimal set of fittings for connection with the injection system of any automobile.

### PNEUMATIC STATION GX-100

Ln2016

A universal and available station for purging petrol engines. It is equipped with a light flask with an optimal volume of 800 ml. The station is delivered with a wide set of fittings for modern automobiles.

## PRODUCTS FOR CLEANING AND TESTING FUEL INJECTORS IN ULTRASONIC CLEANERS

LAVR products for cleaning and testing injectors are proven products intended for sale to car repair shops and service stations. They completely remove harmful deposits, are safe and cost effective. They have been tested on most types of stands of verification and ultrasonic cleaning.

### LIQUID FOR CLEANING FUEL INJECTORS IN ULTRASONIC BATHS

LAVR Ultra-sonic cleaner  
Ln2003 | 5 L

Quickly, efficiently and safely removes resinous, varnish and carbon deposits in the injector. It significantly reduces cleaning time and protects parts from corrosion.

### LIQUID FOR TESTING INJECTORS

LAVR Injector tester  
Ln2004 | 5 L

Provides the most accurate control of the spray cone and performance of injectors during diagnostics on the stand. It removes contaminant remains after cleaning injectors in an ultrasonic bath.

## PRODUCTS FOR CLEANING THE OIL SYSTEM

### PROBLEM

Some motorists believe that high-quality motor oil does not produce pollution and deposits, and it is not necessary to wash the oil system. However, studies confirmed by practice have shown that formation of deposits in the oil system is inevitable. They gradually accumulate reducing the capacity of oil channels and disrupting control valves. If they are not flushed, they petrify and contaminate the entire engine over time.

### SOLUTION

A completely new method of cleaning of the motor oil system was created under the LAVR brand. For the first time in the world auto-chemical industry, concentrates for cleaning oil systems were endowed with unique properties that guarantee high efficiency and complete security of cleaning of even very contaminated systems.

### ADVANTAGES OF CONCENTRATED FLUSHES

- Technological effectiveness. After flushing with a concentrate, the proportion of the product in the new oil stays at the level of trace concentration, but not 8-12% as it happens in the case of flushing oil being used.
- The chemical structure of the oil is not changed. Even though the new motor oil is mixed with the remainder of the old one, it is important to note that it is still mixed with oil having an identical chemical structure. The obtained lubricant is ready for hard workloads and full service life.
- The oil system cleaning procedure by means of concentrated flushes is easy and environmentally friendly.

The assortment of flushes is designed to meet the characteristics of any type of engine. This well-elaborated and technically justified range makes it possible to choose a product that is guaranteed to solve the customer's problem.

The products are sold very well on their own and in combination with motor oils, oil filters, products for decarbonisation, etc. Oil system flushes are the most demanded during the inter-seasonal maintenance period and sell well in automobile service stations and repair shops.

The absolute leader in sales! **With flushes of the cooling system, these products provide up to 36% of the overall revenue of LAVR goods.**

New formula

#### 5-MINUTE ENGINE FLUSH CLASSIC

Ln1003 | 450 ml

The product is intended for regular cleaning of all types of petrol and diesel engines. It is designed for washing the engine oil system with the volume of 4-5 litres.

#### 5-MINUTE ENGINE FLUSH FOR COMMERCIAL TRUCKS CLASSIC ++

Ln1004 | 1000 ml

It contains viscosity corrector which protects the engine in cases of dilution of oil by fuel.

#### 7-MINUTE ENGINE FLUSH LUXE

Ln1002-L | 450 ml

It is ideal for washing turbocharged engines and lubrication systems that have not been cleaned for a long time. The product is designed for flushing oil systems with the volume of 4-5 litres.

#### SOFT ENGINE FLUSH (OIL ADDITIVE)

Ln1005 | 330 ml

This product is for delicate preparation of the lubrication system before oil change. It is applied 150-200 kilometres before oil change. The package is designed for flushing the engine oil system with the volume of 4-6 litres.

## PRODUCTS FOR COOLING SYSTEM CARE

LAVR products for cooling system maintenance are in demand all year round. Peak sales take place in the inter-season period (the period of technical maintenance) and in the summer when it is necessary to protect the engine from overheating.

Car owners prefer buying the products of our range for problems with the cooling system (overheating, malfunction of the radiator heater) before a visit to the car service station, or with antifreeze and parts.

The cooling system flush can be sold as an additional feature in a car service centre or as an independent product.

Together with flushes of the oil system, they provide up to 36 % of the revenue of an outlet of all LAVR products.

Efficient elimination of antifreeze drain from the radiator

### COOLING SYSTEM FLUSH CLASSIC

Ln1103 | 430 ml

A traditional cooling system cleaning technology for cars and trucks used before changing antifreeze. It is designed for cooling systems with the volume of 9-11 litres.

### COOLING SYSTEM FLUSH FOR COMMERCIAL TRANSPORT CLASSIC ++

Ln1104 | 980 ml

The increased volume is intended for large trucks and construction machinery. This package is designed for cooling systems with the volume of 25-35 litres.

### COOLING SYSTEM EXPRESS-FLUSH. ANTIFREEZE ADDITIVE

Ln1107 | 430 ml

This is a convenient express product for preparation of the cooling system to antifreeze change even in the absence of strong contamination. It is added directly to the old antifreeze before replacing it. The package of the product is designed for 8-10 litres of antifreeze.

### RADIATOR SEALANT STOP-LEAK EXPRESS

Ln1105 | 310 ml

It hardens only in the places of leaks and thus does not block radiator tubes. The product does not evaporate at high temperatures. It is not aggressive to metal, rubber and plastic parts. The sealant is compatible with all types of coolants.

Complete elimination of all kinds of contamination from the cooling system

### KIT: FULL 2-STEP CLEANING OF THE COOLING SYSTEM

LAVR 2-component radiator flush

Ln1106 | 310 ml + 310 ml

The product is designed for application with 8-10 litres of antifreeze.

#### Cleaner of scum and rust, composition №1:

- Effectively and safely dissolves lime scale and rust.
- Supports dirt particles suspended as long as they are removed from the system.

#### Cleaner of antifreeze decomposition products, composition №2:

- Effectively and safely dissolves grease and oil deposits.
- Neutralizes acidic environment and removes impurities when washed away.

## DISTILLED WATER

Distilled water is widely used for vehicle maintenance. Unlike tap water, drinking water or purified water, distilled water is practically free of impurities and contamination substances and has low electric conductivity. Distilled water is used for rinsing the cooling system, diluting antifreeze and concentrated glass cleaners. It is needed for preparation of battery electrolytes. It is also used in everyday life for filling irons, electric fireplaces, heating systems of private houses.

Use the highest quality product! LAVR distilled water is several times better than it is required by the strict GOST state standard. This is confirmed by independent tests of the Hygiene and Epidemiology Center of Chelyabinsk Region, Russia.

LAVR distilled water can be sold with products for cleaning the car cooling system, concentrated windshield washing fluids, etc.

Ln5001 | 1000 ml

Ln5002 | 3,35 l

Ln5003 | 5 l

Ln5004 | 10 l

Ln5006 | 20 l, bag

## FUEL ADDITIVES

Fuel additives ensure prevention of early failures of the car. Fuel system cleaners, correctors of the octane or cetane number and multi-purpose fuel cleaning additives are the first aid kit which should always be in the trunk of every car driver.

In winter, there is a need for depressant additives for diesel, such as superantigel, defroster and fuel dryer; and in the autumn and spring - for the neutralizer of water.

Nowadays fuel additives are sold even at gas stations because it is a successful way of winning consumer loyalty.

**!** LAVR fuel additives are sold well all year round and provide more than 12% of the revenue of the outlet from sales of the whole LAVR product range.

## DIRECTED ACTION ADDITIVES

Smart LAVR additives eliminate the risk of clogging of the injection system with deposits washed out of it. Due to their targeted action, they provide the most efficient cleaning. They eliminate harmful deposits directly from the surface of fuel dispensers and injectors even with intense pollution. These fluids are safe to use for cleaning engines of cars with high mileage.

### CARBURETOR CLEANER

LAVR Petrol additive with nozzle, for 40-60 L of fuel

**Ln2108 | 310 ml**

### PETROL INJECTOR CLEANER

LAVR Petrol additive with nozzle, for 40-60 L of fuel

**Ln2109 | 310 ml**

### DIESEL INJECTOR CLEANER

LAVR Diesel fuel additive with nozzle, for 40-60 L of fuel

**Ln2110 | 310 ml**

These products have a focused, directed influence on contamination deposits. They are recommended for cleaning of the fuel system when there are signs of clogging in the engine, or a probability of failure. The cleaning substance should be applied once per 1.5-3 thousand kilometres.

NEW

### THREE-LEVEL PETROL INJECTION SYSTEM CLEANING

LAVOR Petrol additive for cleaning of the injection system

Ln2137 | 3×120 ml

NEW

### THREE-LEVEL DIESEL INJECTION SYSTEM CLEANING

LAVOR Diesel additive for cleaning of the injection system

Ln2138 | 3×120 ml

- Substitutes injection cleaning at a car repair shop
- Removes 100 % of contamination and fully renews injectors
- Decreases fuel consumption

The three-level fuel system cleaner ML100 was developed on the basis of the legendary products for injection system purge ML101 EURO and ML102. The patented components make application of the fuel additive ML100 as effective as the procedure of injector cleaning in a car repair shop. You can wash the injection system by means of this product on your own in an efficient and safe way. The fluid is applied at the temperature of the environment higher than -5°C.

## COMPLEX ACTION ADDITIVES

### COMPLEX FUEL SYSTEM CLEANER

LAVOR Petrol additive with nozzle for 40-60 L of fuel

Ln2123 | 310 ml

### COMPLEX FUEL SYSTEM CLEANER

LAVOR Diesel additive with nozzle for 40-60 L of fuel

Ln2124 | 310 ml

These soft cleaners are recommended for the entire fuel system. They are poured once per 3 thousand kilometres and wash deposits at the initial stage of their formation restoring the cleanliness of the whole fuel system. They can be used when there is a possibility that the fuel tank is contaminated. If used regularly, the additives provide reliable prevention of various malfunctions.

### FUEL CLEANING ADDITIVE WITH COMBUSTION CATALYST

LAVOR petrol or diesel additive for 40-60 L of fuel

Ln2126 | 120 ml

This is a universal additive to any fuel preventing precipitation of contaminants on fuel system parts. It is considered to be a prophylactic means: if you are in doubt of the fuel quality, it prevents the fuel system from clogging. It contains a modified combustion catalyst that allows to economise fuel.

## WATER NEUTRALIZERS

Neutralizers of water and the fuel dryer were created specially for the winter. They remove water and prevent formation of ice jams in fuel lines.

### WATER NEUTRALIZER

LAVR petrol additive with nozzle for 40-60 L of fuel

Ln2103 | 310 ml

### WATER NEUTRALIZER

LAVR diesel additive with nozzle for 40-60 L of fuel

Ln2104 | 310 ml

### WINTER FUEL DRYER

LAVR universal fuel additive with nozzle for 40-60 L of fuel

Ln2125 | 310 ml

## FUEL CORRECTORS

Fuel correctors improve the key characteristics of gasoline and diesel fuel - the octane and cetane number. They protect the engine from damage if there is no certainty about the fuel quality.

### OCTANE PLUS

LAVR petrol additive with nozzle for 40-60 L of fuel

Ln2111 | 310 ml

This product improves combustion processes, reduces fuel consumption and carbon formation. It does not damage the catalysts since it does not contain lead compounds. The product is suitable for regular application.

### CETANE PLUS

LAVR diesel additive with nozzle for 40-60 L of fuel

Ln2112 | 310 ml

The product improves ignition conditions in the engine, especially at low temperatures. Prevents resinification and coking of piston rings.

### FUEL BOOSTER

LAVR petrol additive with nozzle for 40-60 l of fuel

Ln2127-L | 310 ml

Most modern engines are high-powered. However, drivers often face the problem of standard fuel not fulfilling the potential of the engine. Attempts to operate the engine at its maximum power lead to its overheating and early wear. A new additive has been developed to cope with these problems. LAVR motor fuel booster increases engine power due to the increase of the octane number to 100 units. This improves fuel combustion that leads to lower fuel consumption.

## WINTER FUEL CORRECTORS

LAVR Superantigel is a diesel additive which lowers the freezing temperature of diesel fuel (up to -45°C), improves its lubricating properties and protects the engine from rapid wear.

LAVR Superantigel contains a dispersant additive. It provides uniformity of diesel fuel and prevents thick precipitation formation. This prevents clogging of filters and fuel lines.

Thanks to perfect lubricating properties, Superantigel can be used during the whole year as an emergency product when there is no confidence in fuel quality.

### SUPERANTIGEL WITH DISPERSANT

LAVR diesel additive with nozzle for 40-60 L of fuel (-45°C)

1:150

Ln2106 | 310 ml

### SUPERANTIGEL WITH DISPERSANT

LAVR diesel additive with nozzle for 100-140 L of fuel (-45°C)

1:400

Ln2114 | 310 ml

### SUPERANTIGEL WITH DISPERSANT

LAVR diesel fuel additive with nozzle for 500-2000 L of fuel (-45°C)

1:500-2000

Ln2107 | 1000 ml

### SUPERANTIGEL WITH DISPERSANT

LAVR diesel additive for  
6700 L of fuel  
**1:500-2000**  
Ln2121 | 3,35 L

СУПЕРАНТИГЕЛЬ

### SUPERANTIGEL WITH DISPERSANT

LAVR diesel additive for  
40 000 L of fuel  
**1:500-2000**  
Ln2115 | 20 L

СУПЕРАНТИГЕЛЬ

### SUPERANTIGEL WITH DISPERSANT

LAVR diesel additive for  
400 000 L of fuel  
**1:500-2000**  
Ln2120 | 200 L

### SUPERANTIGEL WITH DISPERSANT CONCENTRATE 1:1000-4000

LAVR diesel additive for  
13 400 L of fuel  
Ln2122 | 3,35 L

### SUPERANTIGEL WITH DISPERSANT CONCENTRATE 1:1000-4000

LAVR diesel additive for  
80 000 L of fuel  
Ln2116 | 20 L

This product is for dealing with frozen diesel. The LAVR Company developed this high-tech and effective diesel defroster so that you would not waste time on pointless warming of the engine and the fuel filter. It dissolves and disperses paraffin sediment and ice crystals quickly returning the vehicle to its working condition. The LAVR defroster's quick action is a key to rescue from ice crystals and paraffin in frozen diesel fuel.

### DIESEL FUEL DEFROSTER

Ln2130 | 450 ml  
Ln2131 | 1000 ml

The defroster provides emergency help dissolving ice crystals and paraffin in frozen diesel fuel. This fluid is what all users of diesel transport are always advised to have.

## MULTIFUNCTIONAL REPAIR PRODUCTS

These multifunctional tools will provide reliable help to those who are involved in car repair. They are purchased by professionals and ordinary car owners.

LAVR repair tools have been in high and stable demand for many years.

**Recommend**  
these products to  
those who buy car  
parts or tools for car  
repair.

### UNIVERSAL PARTS CLEANER ML201

Ln1506 | 330 ml

The product does not cause corrosion of ferrous and non-ferrous metal parts including high-precision fuel equipment. It is ideal for small service stations - even in the absence of an ultrasonic unit, the procedure of full and fast cleaning of the fuel injection system can be conducted by simply putting injectors in the fluid.

### LIQUID KEY

Ln1405 | 500 ml

This product allows you to separate stuck and rusted threaded joints quickly and easily. It significantly improves the efficiency of repair work. It lubricates the surface and forms a film that protects car parts from corrosion.

### UNIVERSAL PENETRATING LUBRICANT ML400

Ln1406 | 330 ml

Its high penetration capability allows to disconnect stuck parts without breaking them. It lubricates the threaded surface eliminating creaking and forming resistant film protecting surfaces from corrosion.

### RUST REMOVER

LAVR No Rust Fast Effect

Ln1434 | 120 ml

Ln1435 | 310 ml

The product quickly and efficiently destroys rust and improves adhesion of primer and paint to metal, prevents spread of corrosion. It easily gets into hard-to-reach places, loosens rusted bolts, screws and nuts. It does not contain corrosive acids.

### RUST REMOVER WITH ZINC

LAVR rust remover

NO RUST + ZINC

Ln1436 | 500 ml

Deeply penetrates into the cleaned structure and dissolves rust. It forms firm zinc cover on the surface of metal and prepares it for painting.

### BRAKE MECHANISMS CLEANER

Ln1497 | 500 ml

This product is a universal detergent. It cleans brake parts as well as various parts of the car and other equipment. It is used as a degreaser and cleaner providing maximum dissolution of various greases. It is fast-drying, does not oxidize metal or have a pungent smell.

### BRAKE MECHANISMS CLEANER

Ln 1495 | 400 ml

This product quickly and effectively cleans and removes grease from brake mechanisms and improves their friction characteristics. It eliminates squeak and grind sounds while braking. Increases the efficiency of braking and prolongs the use of brake mechanisms.

**NEW** **DESINFECTING AIR  
CONDITIONER CLEANER**

**Ln1461 | 210 ml**

The product is used without dismantlement of the cabin filter and ventilation system. It removes unpleasant smells and prevents reproduction of bacteria and fungi. It brings a fresh scent of menthol and eucalypt.

**ANTIBACTERIAL FOAM  
CONDITIONER CLEANER**

**Ln1750 | 400 ml**

The highly efficient foam composition of this product quickly removes mould, fungi and bacteria, prevents the risk of developing allergy and respiratory diseases. It removes musty odour from air vents.

**MULTIPURPOSE GREASE  
LV-40**

**Ln1484 | 210 ml**

**Ln1485 | 400 ml**

It effectively eliminates squeak noises and glitching, and restores the proper functioning of mechanisms. It has a high penetrability due to which fast detachment of rusty threaded parts is ensured. It protects parts from corrosion and the influence of the environment.

**WHITE CHAIN LUBE**

LAVR white chain lube with PTFE

**Ln1741 | 400 ml**

This highly efficient lubricant contains a complex of anti-friction additives for treatment of chains of two-wheeled vehicles.

### ANTIGRAVEL (BLACK/GRAY)

LAVR undercoating protection

Ln1551 | 650 ml

Ln1552 | 650 ml

This product ensures long-lasting protection of the car bottom, wheel archs, fenders, bumpers and side skirts from the abrasive effect of gravel, sand and road chemicals.

### CARBURETOR AND THROTTLE CLEANER

Ln1493 | 400 ml

It cleans dispensing channels, nozzles, filter grids, etc. from resin and varnish deposits. It neutralizes the effects of use of poor-quality gasoline and influence of crankcase gas. It eases cold start.

### SILICONE GREASE

Ln1541 | 210 ml

Ln1543 | 400 ml

This product is ideal for protection and lubrication of rubbing parts of mechanisms, rubber moldings, belts, battery cables and moulds during heat processing of plastic. It preserves elasticity of plastic and rubber and protects door locks from freezing.

### SILICONE GREASE

LAVR Silicon grease

Ln1539 | 40 ml

The silicone lubricant in a convenient compact package prevents freezing of car doors after washing or after a warm winter period. It protects rubber weather strips of doors, the boot and bonnet from drying. It makes rubber elastic and prevents its early wearing. The product is sold in an advertising package - the show-box.

### LIQUID KEY

LAVR multifunctional fast liquid key

Ln1490 | 210 ml

Ln1491 | 400 ml

This aerosol with a convenient tip allows to efficiently and accurately apply the product to hard-to-reach connections.

The product penetrates into threaded connections and allows to quickly disconnect stuck bolts, nuts, etc. It removes moisture, lubricates and protects metal parts from corrosion. It eases the start of a dampened engine and protects parts of electrical equipment from oxidation. It lubricates and protects lock mechanisms and cleans rubber and plastic parts.

### ADHESIVE COMPOUNDS

Adhesive compounds are indispensable in both car service and household – they glue together various parts and mechanisms, and firmly fasten thread joints. Parts attached with the LAVR cold weld function even in extreme weather conditions in the temperature range from -60 to +150 °C. Thread lockers are applied to joints which need periodical dismantlement or long-lasting fixation.

### COLD WELD QUICKFIX

LAVR Quick action epoxy putty

Ln1720 | 60 g

The two-component structure quickly glues any materials: ferrous and non-ferrous metals, concrete, wood, plastic, glass, ceramic, etc. It fully hardens within 10 minutes and reaches the ultimate tenacity within 1 hour.

### COLD WELD UNIVERSAL MULTIFIX

LAVR Multifunctional epoxy putty

Ln1721 | 60 g

The two-component robust structure glues any materials: ferrous and non-ferrous metals, concrete, wood, plastic, glass, ceramic, etc. It is used for restoration of functionality of mechanisms, household and professional tools, furniture and bath and toilet equipment.

### COLD WELD QUICK STEEL MULTIFIX

LAVR Epoxy putty for metal parts

Ln1722 | 60 g

The two-component metal-polymer structure ensures complete adhesion of articles made of ferrous and non-ferrous metals and restores detached parts of metallic constructions. It is applicable for fixation of granite, concrete, plastic, wood and polymer materials.

### DEMOUNTABLE THREAD LOCKER

LAVR MiddleFIX

Ln1733 | 9 ml

This product is applicable for hermetic sealing and fixing of fasteners which need periodical detachment during maintenance service. It polymerizes within 20 minutes.

### NON-DEMOUNTABLE THREAD LOCKER

LAVR StrongFIX

Ln 1731 | 9 ml

This product is applied for hermetic sealing and fixing of fasteners which need detachment only in case of major repair. It polymerizes within 20 minutes.

### NON-DEMOUNTABLE HEAT-RESISTANT THREAD LOCKER

LAVR ThermFIX

Ln 1732 | 9 ml

This thread locker is applied for hermetic sealing and fixing of fasteners exposed to high temperatures and needing dismantlement only in case of major repair. It polymerizes within 2 hours.

## HAND CLEANING PRODUCTS

### CLEANING PASTE FOR HANDS WITH POROUS SCRUB-GRANULES

LAVR handwash paste

Ln1701 | 500 ml

Ln1703 | 5 L

The product gently and effectively cleans hands from complex dirt: oil, lubricants, bitumen and others. The porous scrub granules included in the composition ensure complete and deep cleansing of hands and do not injure skin. The components moisturize and regenerate skin. The product excellently foams and is easy to wash away with running water. It does not leave sticky film after use. It has a pleasant aroma.

## INDUSTRIAL PRODUCTS

Highly efficient and cost-effective products for removal of industrial dirt will help to quickly get rid of rust, grease, carbon and resin-coke deposits.

### INDUSTRIAL RUST REMOVING PRODUCT LAVR PL302

Ln1515 | 5 L

Ln1516 | 30 L

Ln1517 | 200 L

This is a concentrated acid for removing rust, scale, carbonate and lime deposits from the surface of ferrous and nonferrous metals, porcelain and ceramic tiles. It has degreasing properties and is easily soluble in water of any hardness.

### MULTIFUNCTIONAL INDUSTRIAL WASHING PRODUCT LAVR PL300

Ln1509 | 5 L

Ln1510 | 30 L

Ln1511 | 200 L

This product cleans industrial machinery and equipment, ferrous and non-ferrous metal parts, polymers and rubber from remnants of fuel and lubricants, coolants, oil and operational pollution, degreases metal surfaces from conservation lubricants, prepares the surface for painting, electroplating, soldering and welding.

### SCALE AND RESIN REMOVING PRODUCT LAVR PL303

Ln1518 | 5 L

Ln1519 | 30 L

Ln1520 | 200 L

This fluid is intended for removing resinous, coke, scale deposits in heat exchangers, furnaces, communications and other industrial units and aggregates which circulate petroleum, oil, masut and hydrocarbon fuels. It dissolves and extrudes heavy pollutions from the system. It does not cause corrosion of metals, does not foam and needs no dilution.

### INDUSTRIAL GRAPHITE REMOVING PRODUCT LAVR PL301

Ln1512 | 5 L

Ln1513 | 30 L

Ln1514 | 200 L

It cleans metal surfaces from graphite grease and fixed contamination by means of jet or bubbling method.

PURE  
CONFIDENCE

**AUTO COSMETICS**

## PRODUCTS FOR CAR WASHES

Due to the high quality of raw materials and constant efforts to improve formulations, LAVR products for car washes are better than their analogues, and are offered at a reasonable price.

### QUICK WAX CONCENTRATE 1:50 - 1:100

Ln1449 | 1 L  
Ln1450 | 5 L

### CHERRY WAX CONCENTRATE 1:40 - 1:80

LAVR Cherry Wax  
Ln1444 | 1 L  
Ln1445 | 5 L

## PRODUCTS FOR ENGINE BAY CARE

### ANTISTATIC PLASTIC POLISH

LAVR Interior plastic polish

Lime Ln1625 | 400 ml  
Cherry Ln1626 | 400 ml  
Vanilla Ln1627 | 400 ml

These products are professional fluids for cleaning and polishing the dashboard as well as plastic surfaces, vinyl and rubber decoration elements. They refresh the initial colour, fill unevennesses and scratches of the surface, and restore the appearance of plastic elements of the car interior.

### MULTIFUNCTIONAL NANOPROTECTION FROM WATER AND DIRT

LAVR Universal hydrophobic nanoprotection

Ln1472 | 185 ml  
Ln1469 | 310 ml

The fluid provides ideal protection of car upholstery, clothes and footwear. It prevents liquid penetration by forming a steady water and dirt repellent cover for up to three months. The product is hypoallergenic and safe for child clothes.

## LEATHER CARE

LAVR auto cosmetics for car leather care help to gently clean, bring out the texture, give softness and shine to upholstery. The products do not contain aggressive solvents, are quickly absorbed and leave no grease film.

### LEATHER CLEANER

Ln1470-L | 185 ml

It copes with stubborn stains, does not contain aggressive solvents, forms rich foam that gently cleans the surface without damage.

### LEATHER RESTORING CONDITIONER

Ln1471-L | 185 ml

It fills pores and protects leather from drying and cracking. It is quickly absorbed and does not require washing off.

## FABRIC SURFACE STAIN REMOVERS

### FOAM VELOUR AND UPHOLSTERY CLEANER

Ln1564 | 650 ml

This unique foamy fluid cleans upholstery elements, textile materials and velour from complex food and drink stains. The active foam quickly penetrates into the tissue, raises and completely removes dirt, and returns original appearance to upholstery and decor elements.

### ANTI SPOT

LAVR Spot remover

Ln1465 | 120 ml

The product easily removes complex stains of various origins, carefully treats delicate fabric materials without damaging them. It is indispensable during housework due to its ability to eliminate stubborn stains from clothes and upholstery. It does not contain chlorine.

### CAR UPHOLSTERY CLEANER

LAVR Fresh Foam cover cleaner

Ln1446 | 120 ml

Ln1400 | 310 ml

Ln1464 | 480 ml

This product makes the car interior look new again removing stains of coffee, juice, motor oil, lipstick and other contaminants. It is a highly concentrated and economical product. It does not contain corrosive components. The cleaner is suitable to use in the car and at home - for cleaning upholstery and carpet surfaces.

## CAR BODY CARE PRODUCTS

**ANTI-POPLAR**  
Ln1423 | 185 ml

This product quickly and safely cleans traces of poplar buds and other organic dirt from paint, varnish, chrome coating, plastic, rubber, glass and other car surfaces.

**UNIVERSAL CAR BODY CLEANER**  
Ln1409 | 500 ml

This is a universal product which perfectly cleans dirt, oil and bitumen stains, poplar buds, etc. from car paint and external decor elements. It is safe for all types of vehicle cover and suitable even for cleaning surfaces that are chipped and scratched.

**ANTI-FLY INSECT REMOVER**  
Ln1421 | 500 ml

It quickly washes all surfaces of the car: windows, body, plastic and chrome-plated bumpers, number plates, etc. It is ideal for cleaning the radiator from organic marks and perfect to use on long-distance journeys for fast removing of insects from the windshield.

**TAR REMOVER**  
LAVR Ultra-effective anti-bitumen cleaner  
Ln1403 | 500 ml

An effective product for removing bitumen stains. Thanks to its hydrocarbon base, it quickly copes with dirt and leaves no greasy film. The product is safe for paint, vinyl and armour surfaces. It is easily washed off with water.

### HEADLIGHT RESTORER

LAVR Polish and restorer of headlights  
Ln1468 | 20 ml

It returns transparent plastic its lost gloss and deeply restores even old headlights making them look absolutely new; completely removes darkness, and yellowness from the surface, fills small and even deep scratches, and restores transparency. It forms protective film of wax and silicone which allows to maintain the achieved effect for a long time and protect plastic from UV rays.

### MULTIPURPOSE CAR BODY POLISH

LAVR universal carnauba wax polish  
Ln 1480 | 310 ml

It gives glossy shine to paint and varnish cover of the car body, makes the color more vivid and saturated, masks minor scratches. It forms solid transparent film that protects the car surface from fading, corrosive effects of the environment and road chemicals. It has pronounced water-repellent properties. It is non-toxic and contains natural carnauba palm wax.

### QUICK WAX

LAVR extra quick drying wax  
Ln1448 | 500 ml

The product permanently gives paint and varnish cover glossy shine, forms a stable water-repellent film which protects the car body from the harmful effects of environmental pollution until the next wash. The active complex of wax, silicone and special ingredients instantly breaks water film on the surface of the car and assembles water into large drops which quickly flow down the surface. Due to this, the car dries in less than 1 minute.

### EXTRA QUICK CAR BODY POLISH

LAVR Superfast car polish  
Ln1486 | 480 ml

The specially created formula based on silicone and wax provides extra quick treatment of the surface reducing the polishing time to 10-15 minutes. Liquid wax is conveniently applied to the surface by means of a sprayer, and is easily spread. It restores and enhances the shine of the car body. It is economical to use: 100-150 ml of the polish is enough to cover a car.

## WHEEL CARE PRODUCTS

Road chemicals, unfavourable climate conditions and extreme driving lead to early wearing of rubber. In the absence of care, it starts to harden and crack. Reliable protection is also needed for plastic bumpers, which also start to look worse with time.

LAVR car cosmetics for shining bumpers and tires reliably protects them from the harmful effects of the environment and refreshes their deep black colour. The multipurpose products of LAVR for cleaning wheels are ideal for regular care for discs of any type.

### TIRE AND BUMPER SHINE

LAVR Tire conditioner with mat effect

Ln1401 | 500 ml

This product permanently gives tires and plastic well-groomed and noble mat appearance without stickiness and greasy shine. It is easy to apply, it quickly penetrates into the micro-relief of tires and does not require additional polish. The complex of modified silicone protects the tire from cracking.

### TIRE SHINE WITH SILICONE

LAVR Tire conditioner with silicone

Ln1475 | 500 ml

This treatment gives tires rich dark color and noble shine, extends the life of tires protecting them from wearing, cracking and harmful UV rays. It makes damaged surfaces less noticeable and gives an instant and long-lasting effect. It is easy to apply and suitable for treatment of weather strips.

### NEW WHEEL DISK CLEANER

Ln1439 | 500 ml

This is an excellent alternative to cleaning disks at a carwash or with the help of universal wheel care substances! It excellently removes dirt from wheel disks of any type. It does not cause fading of chromate-plated and aluminium disks.

## MANUAL CAR WASH SHAMPOOS

Highly concentrated LAVR car shampoos for manual cleaning perfectly cope with different kinds of dirt. These products do not damage the coating of the car body or cause darkening of chrome and aluminium. They additionally contain a corrosion inhibitor for protection of metal parts. They are suitable for cleaning glass, plastic, rubber and other elements of car exterior and interior decoration, and well-soluble in water of any temperature and hardness.

### GREEN CAR SHAMPOO SUPER CONCENTRATE 1:200

Ln2263 | 185 ml  
Ln2264 | 450 ml  
Ln2265 | 1000 ml

### ORANGE CAR SHAMPOO SUPER CONCENTRATE 1:200

Ln2295 | 185 ml  
Ln2296 | 450 ml  
Ln2297 | 1000 ml

### CRYSTAL CAR SHAMPOO SUPER CONCENTRATE 1:200

Ln2207 | 185 ml  
Ln2208 | 450 ml  
Ln2209 | 1000 ml

## LUX CAR SHAMPOOS

The products of this group ensure effective removal of dirt and gentle care for the car! The formula of luxury car shampoos for manual car wash is enriched with conditioning components that take care of paint and varnish surfaces and protect them from the harmful effects of the environment.

### CAR SHAMPOO WITH CONDITIONER AND PROTECTIVE MODIFIED SILICONE

**SUPER CONCENTRATE**

**1:160**

**Ln2201-L | 330 ml**

This shampoo contains modified silicone which effectively protects car paint against corrosion, the harmful effects of moisture and subsequent contamination. It makes small defects less visible and leaves no greasy film after application.

### CAR SHAMPOO AND POLISH WITH CARNAUBA WAX

**SUPER CONCENTRATE**

**1:160**

**Ln2202-L | 330 ml**

It contains natural carnauba palm wax giving paint and varnish covering a bright gloss. It provides polishing effect without streaks and grease stains; it masks minor scratches.

## GLASS CARE PRODUCTS

This group contains special products for quick cleaning of windows, mirrors and other vehicle surfaces. The products do not have a harmful effect on car enamel and rubber weather strips. They have a pleasant aroma.

These liquids are recommended for every-day use, do not leave streaks, smudges and are absolutely safe for car tints. They can be used for household purposes. They do not contain highly toxic methanol and ammonia! The products of the group are environmentally friendly, harmless to the respiratory system and general health.

### CRYSTAL MULTIPURPOSE GLASS CLEANER

**Ln1600 | 185 ml**

**Ln1601 | 500 ml**

**Ln1607 | 5 L**

**Ln1608 | 5 L**

**CONCENTRATE 1:5**

### MULTIPURPOSE GLASS CLEANER ORANGE

Ln1610 | 500 ml

### ANTISTATIC FOAM GLASS CLEANER

LAVR Antistatic foaming  
glass cleaner

Ln1620 | 650 ml

The highly active composition of this product easily removes road dust, dirt, insect splats, sticker glue marks, road chemicals from the windscreen, mirrors and headlights of the car. It guarantees absolute transparency, does not leave marks and improves visibility.

### ANTI RAIN

LAVR Anti Rain With Dirt-Repellent Effect

Ln1615 | 185 ml

Thanks to the instant dirt and water repellent effect, this product helps to keep clear view of the road and extend the life of wiper blades. It is indispensable for treatment of window glass, headlights, lamps and door mirrors as well as home glass items and shower cabins.

### ANTI FOG

Ln1408 | 185 ml

This fluid reliably prevents fogging of glass, mirrors and headlights of the car. Does not leave stains and rainbow film, improves visibility of the road. It is applicable at home for the treatment of mirrors in the bathroom, windows and glasses.

## GLASS WASHERS

The formula of these washers is designed specially for the summer season. These products perfectly remove dust, grease, insect marks and other dirt from the windshield of the car. Special additives protect the washing system from corrosion and formation of harmful deposits.

**Dilution with  
LAVR distilled water  
is recommended**

### GREEN ANTI-FLY GLASS WASHER

**CONCENTRATE 1:40**

Ln1220 | 120 ml

Ln1221 | 330 ml

Ln1222 | 1000 ml

### ORANGE ANTI-FLY GLASS WASHER

**CONCENTRATE 1:40**

Ln1215 | 120 ml

Ln1216 | 330 ml

Ln1217 | 1000 ml

### CRYSTAL ANTI-FLY GLASS WASHER

**CONCENTRATE 1:40**

Ln1225 | 120 ml

Ln1226 | 330 ml

Ln1227 | 1000 ml

### CRYSTAL ANTI-FLY GLASS WASHER

Ln1209 | 3,35 L

Ln1208 | 5 L

The product is ready to use and does not require dilution with water before filling the washer reservoir. It effectively cleans glass and headlights from mud, rain and insect marks, quickly returning perfect visibility. It does not leave streaks and protects the washing system from corrosion.

**In manufacturing of this product, LAVR distilled water is used.**

## PROFESSIONAL RANGE OF AUTO COSMETICS

Professional LAVR product range of auto cosmetics contains unique products for car care of a new generation. The formulations of the fluids with a high content of active ingredients efficiently and safely remove dirt, and the conditioning substances gently care for plastic parts, rubber, paint and varnish coating.

### TAR REMOVER WITH SILICONE

Professional Formula  
LAVR Anti-bitumen  
professional Lux  
Ln1404-L | 330 ml

This fluid removes tar spots, resin and oil dirt from all surfaces of the car twice as fast as regular products! The modified silicone composition additionally protects the surface during treatment.

### TIRE AND BUMPER SHINE

Professional Formula  
LAVR Professional deep  
tire restorer  
Ln1411-L | 330 ml

Application of this professional tire shine with a pronounced conditioning effect makes tires look new. It deeply penetrates into rubber, restoring it from the inside and protects tires from and cracking. The product is suitable for treatment of external plastic parts.

### PLASTIC POLISH WITH VELVET EFFECT

Professional Formula  
Ln1425-L | 120 ml  
Ln1426-L | 310 ml

The product polishes plastic parts giving them a noble matt look, enriches the color and masks scratches. It visually improves the surface, allowing it to look more well-groomed and prevents fading.

### PLASTIC POLISH AND RESTORER

Professional Formula  
LAVR Plastic polish with  
anti-scratch effect  
Ln1459-L | 120 ml  
Ln1460-L | 310 ml

This fluid creates resistant coating with a pronounced restoration effect, fills minor surface unevenness, cracks and scratches, and returns the texture of plastic its original appearance. It is ideal for treatment of parts experiencing accelerated wear, such as sills and wheel arches. It is indispensable in household care for plastic panels, screens, etc.

## WINTER AUTO COSMETICS AND AUTO CHEMISTRY

### NON-FREEZING WINDSCREEN CLEANER -10°C

LAVR Anti Ice - Ln1312 | 3,9 L

### NON-FREEZING WINDSCREEN CLEANER -15°C

LAVR Anti Ice - Ln1313 | 3,9 L

### NON-FREEZING WINDSCREEN CLEANER -20°C

LAVR Anti Ice - Ln1314 | 3,9 L

### NON-FREEZING WINDSCREEN CLEANER -25°C

LAVR Anti Ice - Ln1310 | 1000 ml  
Ln1315 | 3,9 L

### NON-FREEZING WINDSCREEN CLEANER CONCENTRATE -80°C

LAVR Anti Ice - Ln1324 | 1000 ml

This is a range of indispensable products for winter! They effectively clean the windshield of the car, without leaving glare and rainbow film. The special formulation of the products prevents formation of ice on windcreens and wipers and protects the washing system from corrosion and freezing.

### QUICK START

LAVR Easy ignition starting fluid  
Ln1546 | 335 ml

It promotes fast and easy start of petrol and diesel engines at low temperatures, high humidity, with low-quality fuel. It reduces the load on the ignition system and increases the starter and the battery life. The product is non-corrosive and safe for plastic and rubber parts of the feed system.

### WINTER GLASS CLEANER

LAVR Anti-ice glass cleaner -30°C

Ln1301 | 500 ml

Quickly and without a trace of dirt, removes ice from windows, mirrors, headlights and number plates, without leaving streaks and greasy film. The product keeps its properties at temperatures above -30°C

### LOCK AND GLASS DEICER

LAVR Universal defroster -80°C

Ln1302-L | 500 ml

The fluid helps to defrost locks, windows, mirrors and other surfaces of the car without a possibility of scratching them. It effectively melts snow and ice, even at extremely low temperatures! It does not leave greasy film and is safe for all materials, such as rubber, plastic, paint and varnish coatings.

### LOCK DEICER WITH SILICONE GREASE

LAVR Quick silicone defroster

Ln1309 | 75 ml

The convenient aerosol package does not take up much space and allows you to always have it at hand. The substance of the product is non-corrosive and has a high level of lubricity. It is designed for defrosting automobile, garage and other locks and padlocks. The product is sold in an advertising package - the show-box.

### LOCK DEICER WITH SILICONE LUBE

LAVR Quick defrosting silicone fluid

Ln1304 | 40 ml

This lock defroster is in a convenient compact package. The product quickly dissolves ice in door locks and effectively lubricates mechanisms. It removes moisture and prevents subsequent freezing, prevents corrosion of metals. The product is sold in an advertising package - the show-box.
